# Aquib Alam

Software Engineer — Full-Stack Developer
+91-93083-44430 | aquibalam399@gmail.com | aquibalam.tech | linkedin.com/in/aquib-alam | github.com/aquib399 | Kolkata

## Education

**Brainware University** — Kolkata, WB
*B.Tech in Computer Science and Engineering (GPA: 7.4/10)* — *2026*

**BIT Mesra** — Ranchi, JH
*Diploma in Computer Science and Engineering (GPA: 9.01/10)* — *2023*

## Experience

**Digontom** — Kolkata (Hybrid)
*Full Stack Developer – Part-time* — *Jun 2026 – Sep 2026*
- Built full-stack AI agent and chatbot applications for client projects, translating business requirements into automated conversational workflows
- Integrated third-party APIs, including WhatsApp Business API automation, to extend chatbot and agent functionality across client deployments
- Delivered end-to-end full-stack features across concurrent AI-agent projects using clean, maintainable coding practices

**ControlShift** — Dubai (Remote)
*Full Stack Intern* — *Jan 2026 – Aug 2026*
- Collaborated with a 15-member cross-functional team across 50+ client web and mobile application projects spanning diverse requirements, codebases, and business domains
- Built maintainable applications using MVC architecture, SOLID principles, and reusable components across multiple client projects
- Led SEO/SEM optimization initiatives to improve organic visibility, search performance, and lead generation across client websites

**Scrollify** — Delhi (On-site)
*Software Engineer Intern* — *May 2025 – Jan 2026*
- Architected and built core components of a configurable Rule Engine for runtime business logic, supporting dynamic data models, validation rules, conditional branching, events, and workflow outcomes
- Collaborated on workflow orchestration for multi-step execution using dependency injection and gRPC-based service communication, integrating internal services, event-driven actions, third-party APIs, and automated WhatsApp flows
- Built core platform services in Go and Django and the configuration layer in Next.js, operating the system on self-managed infrastructure

**DxDeals** — Dubai (Remote)
*Freelance Full Stack Developer* — *Apr 2024 – Jul 2024*
- Built a responsive Next.js frontend using Tailwind CSS and shadcn/ui, backed by Node.js, Express, and MongoDB services deployed on AWS EC2 for a multi-country e-commerce platform
- Integrated Stripe, Paymob, Mastercard, Algolia Search, Google Tag Manager, AWS S3, and Interakt for payments, product discovery, analytics, and customer engagement
- Optimized SEO and Google Merchant Center performance, achieving #1 product rankings across Google Merchant results in the UAE and Middle East

## Projects

**PatchMyCode – AI-Powered GitHub PR Review & Remediation Engine** | *TypeScript, Next.js, Node.js, Express, MongoDB, tree-sitter, AST, GitHub App API, LLMs*
- Engineered an AST-based static analysis engine using **tree-sitter** across 12+ languages, with recursive call-graph traversal to compute transitive dependency blast radius and provide architectural context to LLMs
- Architected an asynchronous, event-driven GitHub App pipeline that processes PR webhooks, analyzes diffs, classifies findings as Error, Warning, or Suggestion, and posts contextual inline reviews
- Built a **1-click remediation engine** that generates and validates fixes, commits them directly to PR head branches via GitHub REST API, supports `/fix` commands, and prevents bot-triggered CI loops
- Built a Next.js management console with repository onboarding, branch-level review policies, live PR backlog telemetry, and configuration management using TanStack Query and MongoDB

**Drift – Social Media** | *Next.js, Tailwind, shadcn/ui, Prisma, PostgreSQL, Stream Chat*
- Built a full-stack social media application using Server Actions, server-side caching, and optimistic UI updates to reduce perceived latency
- Implemented session-based authentication with Lucia, UploadThing media uploads, Stream Chat messaging, and CI/CD using GitHub Actions and Vercel Cron

## Technical Skills

**Languages**: TypeScript, JavaScript, Go, Python, C++, Java, HTML/CSS
**Frontend**: React.js, Next.js, React Native, Redux, React Query, Tailwind CSS
**Backend**: Node.js, Express, Django, REST APIs, gRPC, WebSockets, SSE
**Databases**: PostgreSQL, MongoDB, Redis, Prisma ORM
**Cloud & DevOps**: AWS (EC2, S3, Lambda), Docker, Git/GitHub, GitHub Actions, CI/CD
